

Problem B. Restore the Permutation by Merger

Time limit 1000 ms

Mem limit 262144 kB

A permutation of length n is a sequence of integers from 1 to n of length n containing each number exactly once. For example, $[1]$, $[4, 3, 5, 1, 2]$, $[3, 2, 1]$ are permutations, and $[1, 1]$, $[0, 1]$, $[2, 2, 1, 4]$ are not.

There was a permutation $p[1 \dots n]$. It was merged with itself. In other words, let's take two instances of p and insert elements of the second p into the first maintaining relative order of elements. The result is a sequence of the length $2n$.

For example, if $p = [3, 1, 2]$ some possible results are: $[3, 1, 2, 3, 1, 2]$, $[3, 3, 1, 1, 2, 2]$, $[3, 1, 3, 1, 2, 2]$. The following sequences are not possible results of a merging: $[1, 3, 2, 1, 2, 3]$, $[3, 1, 2, 3, 2, 1]$, $[3, 3, 1, 2, 2, 1]$.

For example, if $p = [2, 1]$ the possible results are: $[2, 2, 1, 1]$, $[2, 1, 2, 1]$. The following sequences are not possible results of a merging: $[1, 1, 2, 2]$, $[2, 1, 1, 2]$, $[1, 2, 2, 1]$.

Your task is to restore the permutation p by the given resulting sequence a . It is guaranteed that the answer **exists and is unique**.

You have to answer t independent test cases.

Input

The first line of the input contains one integer t ($1 \leq t \leq 400$) — the number of test cases. Then t test cases follow.

The first line of the test case contains one integer n ($1 \leq n \leq 50$) — the length of permutation. The second line of the test case contains $2n$ integers a_1, a_2, \dots, a_{2n} ($1 \leq a_i \leq n$), where a_i is the i -th element of a . It is guaranteed that the array a represents the result of merging of some permutation p with the same permutation p .

Output

For each test case, print the answer: n integers p_1, p_2, \dots, p_n ($1 \leq p_i \leq n$), representing the initial permutation. It is guaranteed that the answer **exists and is unique**.

Sample 1

Input	Output
5	1 2
2	1 3 4 2
1 1 2 2	1 2 3 4 5
4	1 2 3
1 3 1 4 3 4 2 2	2 3 4 1
5	
1 2 1 2 3 4 3 5 4 5	
3	
1 2 3 1 2 3	
4	
2 3 2 4 1 3 4 1
